

## **Personal Firewalls -- OhioLINK Requirements**

**If you are considering implementing a Firewall on your home computer for security reasons, the following requirements must be met in order to maintain access to OhioLINK services.**

### Web Databases

Firewall should allow HTTP on port 80 to \*.ohiolink.edu

### Electronic Journal Center -- Access to Personal Accounts from Off Campus

Firewall should allow HTTP traffic on port 2000 to journals.ohiolink.edu

### Remote Access

Firewall should allow traffic to port 20080 on each OhioLINK database server:

198.30.120.27, 198.30.120.41, 198.30.120.42, 198.30.120.43

### Digital Media Center

For streaming videos (e.g. Physics or Films for the Humanities and Sciences), the firewall will need to have ports 554 and 8080 to be open for dmc.ohiolink.edu (198.30.120.51).
