What is open access and  
what are the benefits?

# Types of journals

## Subscription only journals:

- Free to publish but need to be subscriber to read

## Open access journals:

- Articles are freely accessible online

# A word about words

## A quick guide to Open Access terminology

- Immediately, freely available online for all to read, download, reuse and share
- An Article Publication Charge (APC) is typically applied. This may be covered by an institution or funder
- Published under a Creative Commons (CC) license, author retains copyright

- The author self-archives a version of the subscription article in an online repository or website
- Usually subject to a 12 or 24 month embargo period
- Authors retain the right to use their articles for certain purposes

- Articles (usually in subscription journals) that are made free to read by the publisher
- Articles are not formally licensed for reuse
- No fee or charge, but publisher is not under any obligation to keep the article free to read

- The article is immediately, freely available online for all to read, download, reuse and share; author retains copyright
- No direct author fees– publishing costs supported by a sponsor

# Creative Commons

## Creative Commons Attribution

This is the most accommodating of licenses offered  
Recommended for maximum dissemination and use of licensed materials  
Places umbrella stipulation on all CC licenses requiring credit to original author(s)

## Creative Commons Attribution-Noncommercial

Lets others remix, tweak, and build upon your work non-commercially, in any format  
Derivative works must also provide proper attribution, a link to the license and the document indicate if any changes were made

## Creative Commons Attribution-No Derivative Works

Allows for copying and redistribution, commercial and non-commercial, in any format, as long as proper attribution is given, a link to the license is provided, **Does not permit the distribution of modified material**

This will increase the visibility and impact of your research; the fees to publish open access are already covered and opting out of publishing open access would not save you or your institution money.

Your entitlement to open access publishing provided by DEAL, as corresponding author of the article, will be verified by the institution selected above. Please ensure your institutional affiliation here matches the one in your proofs, ahead of publication.

### Please specify who owns the copyright for this article

The answer to this question will tell our system whether you are authorized to sign this form yourself, or if you will be required to obtain another signature in order to legally transfer or retain copyright.

**Contributor-owned work**

This is the correct selection for most authors. It is customary in most academic and healthcare institutions for faculty to retain copyright for articles that they have authored. Please check whether different policies apply in your institution.

**U.S. Government work**

Applies only if your work was authored as part of your official duties as a United States federal government employee; such works are in the public domain in the US.

**U.K. Government work**

Applies only to employees of the U.K. Government.

**Non-Governmental Organization work**

Applies only if the work was carried out during the course of employment by a Non-Governmental Organization.

**Other Government work**

Applies only to government employees outside of the U.S. and U.K.

**Company/institution-owned work**

This does not typically apply to most universities and academic institutions. Applies when an organization, often a commercial corporation, owns the copyright of a work either because there is a specific clause in the author's contract of employment that states the company/institution's ownership of its employees' intellectual property, or it has been contracted ('made for hire').
