

Summary of OhioLINK’s Open Access Publishing agreements

“Open Access” (OA) means that scholarly publications are available without subscription paywall barriers, and usually licensed for reuse. See a good primer [here](#).

[OhioLINK](#), Ohio’s academic library consortium, has negotiated deals with publishers that increase the number of journal titles available for faculty and students as well as offer open access publishing at no cost to authors. Authors at most two-year and four-year non-profit colleges and universities in Ohio can increase the availability of their research without any Article Publication Charges (APCs). For questions about journals and other resources available to you through your institution’s library, contact your librarian.

	Wiley	Cambridge University Press	IOP Publishing (subsidiary of Institute of Physics)
Eligible dates (Article must be accepted for publication during this period)	Mar 1, 2022 - Dec 31, 2023	Jan 1, 2022 -Dec 31, 2024	January 1, 2023 - December 31, 2025
Other eligibility requirements (A Corresponding author will handle all the correspondence and the manuscript decisions during the publication process.)	<ul style="list-style-type: none"> Corresponding Author (CA) affiliated with participating OhioLINK institution at acceptance date Must be research or review articles There is an annual limit to OA articles. If reached, authors may choose to publish as subscription access at no charge or OA with a 10% discount on the APC. Check eligibility with Wiley’s “Open Access Funds – Payments Made Easy” tool 	<ul style="list-style-type: none"> Corresponding Author (CA) affiliated with participating OhioLINK institution at acceptance date Must be research or reviews articles including rapid communications, brief or case reports Check eligibility using Cambridge’s OA Waivers & Discount checker tool 	<ul style="list-style-type: none"> Corresponding Author (CA) affiliated with participating OhioLINK institution at acceptance date Must be research or review articles Check eligibility using IOPP’s Journal Finder
Corresponding Author determination (See above definition of Corresponding Author)	Institutional affiliation stated at submission. Using email address for eligible, affiliated institution helpful to confirm eligibility.	Institutional affiliation stated at submission. Using email address for eligible, affiliated institution helpful to confirm eligibility. See Cambridge “Corresponding Author” page .	Institutional affiliation stated at submission; IOP will confirm.
